

JOSHUA C. SALCEDA

Full-Stack Developer (Laravel + React)

09335260170 | joshuasalceda0021@gmail.com | Bacoar City, Cavite

GitHub: <https://github.com/ItsMeJosue0021>

PROFESSIONAL SUMMARY

Full-stack developer specializing in Laravel and React, with hands-on experience building and deploying real-world web applications. Developed systems for both academic and government use, including a prototype management system at PhilHealth. Skilled in designing RESTful APIs, integrating frontend and backend systems, and delivering functional business solutions. Strong foundation in software development, database design, and modern web technologies.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS

Backend: Laravel (MVC, REST API), Spring Boot (basic)

Database: MySQL, PostgreSQL

Tools & Deployment: Vercel, Hostinger, Google Cloud Run, Git, Codex

Concepts: RESTful API Development, MVC Architecture, SDLC, Agile

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Self-Employed | Jan 2024 – Present

- Developed full-stack web applications using Laravel for backend and React.js for frontend, delivering functional systems for client requirements
- Built and integrated RESTful APIs to handle business logic, data processing, and system workflows
- Designed and managed MySQL databases, including schema design and data relationships
- Implemented responsive and user-friendly interfaces using Tailwind CSS
- Deployed applications using Vercel, Hostinger, and Google Cloud Run depending on project requirements
- Collaborated directly with clients to gather requirements and translate them into working system features

System Developer Intern

PhilHealth Central Office – Pasig City | Mar 2024 – Jul 2024

- Led the development of a **Benefit Packages Management System prototype** for a government institution
- Handled both frontend and backend development using Python (Django MVT)
- Designed system workflows and implemented core modules for data processing and management
- Collaborated with supervisors and team members to align system features with organizational needs

Instructor

Cavite State University – Bacoar / St. Jude College Dasmariñas | Sept 2025 – Present

- Delivered technical instruction in Object-Oriented Programming, Data Structures and Algorithms, Android Development, and Human-Computer Interaction

- Designed hands-on laboratory activities simulating real-world software development scenarios
- Mentored students in building applications and applying problem-solving and system design principles

PROJECTS

Kalinga Ng Kababaihan – Full-Stack Management System

(Ongoing Project) <https://www.kalingangkababaihan.com/>

- Developing a full-stack web-based system to support organizational operations, including **donation management, membership, and volunteer coordination**
- Built modules for handling **cash and GCash donations, as well as in-kind (goods) contributions**, with tracking and validation features
- Designed and implemented an **inventory system** to monitor donated goods and their allocation
- Developed **project management and expense tracking modules** to support transparency and operational planning
- Created a **content management system (CMS)** for updating website content dynamically
- Implemented **member and volunteer management features**, including data handling and role-based access
- Built using **Laravel (backend), React.js (frontend), and MySQL database**, following RESTful API architecture

Mambog Elementary School Management Information System

- Developed a web-based management system as a capstone project for a public school
- Implemented core features for managing school data and operations
- Recognized as **Best Capstone Project and Best Research Paper**

EDUCATION

Bachelor of Science in Information Technology

Cavite State University – Bacoar City Campus

Sept 2020 – Sept 2024

- **Magna Cum Laude**
- Best Capstone Project
- Best Paper & Best Paper Presenter
